EDITORIAL

10  Use Best Practices for a Successful AMI System Rollout

The lessons learned during a recent advanced metering infrastructure (AMI) project can benefit any water utility considering or installing an AMI system.  BY SAM CAIN

AUTOMATION

14  Industrial Internet of Things Puts New Pressure on Traditional Control Systems

Drawing from the Industrial Internet of Things, a water utility can tie data from sensors and other equipment into its existing control network to economically combine information into one system.  BY SCOTT DUHAIME

CONSERVATION

16  Save Water With Landscape Transformation

In the 18th century, a green lawn was a status symbol. These days, water conservation is a priority.  BY MAUREEN ERBEZNIK AND THOMAS W. CHESNUTT

MEMBRANES

20  Project Planning, Teamwork Are Key to Membrane Replacement Success

Investing significant resources to develop a sensible project management plan paid big dividends when it came time to replace 7,308 ultrafiltration modules in one of North America’s largest membrane treatment facilities.  BY TEODOR KOCHMAR, BROCK HEDGES, AND ELLIOT WUORINEN
